

MARY KAY®

Paraben Free Product List

U.S. Regular Line Products Only (No Limited Edition or Discontinued Products)

Parabens are an approved class of preservatives that are used widely in a variety of food, drugs and cosmetics to keep products fresh & safe. They have a long history of safe use, recently confirmed by various medical & scientific authorities and governing bodies around the world. However, if you have a customer who would like to avoid using products containing parabens, we have products they will love.

Our goal is to have everybody say, “I love my Mary Kay!” We value the feedback of our consumers and desire them to be 100% satisfied. Mary Kay continually explores new ingredients and packaging designs all the time as part of the product innovation. In some products we offer non-paraben preservation technology.
